

POWERING CANADA'S FUTURE

Canada's current installed capacity:

2,956 MW

Across Canada, electricity generated from wind is already powering over one million homes and businesses in a clean, reliable and efficient manner. With Canada's unparalleled wind resource, there are still opportunities to do more to maximize the economic, industrial development, and environmental benefits associated with wind energy for Canada.

- 523 MW of new installed capacity in 2008
- 2009 will be a record year for wind energy development in Canada with new installed capacity from wind energy projects totaling 790 MW
- By the end of 2009, Canada will have 3,159 MW of installed capacity with wind developments operating in every province for the first time ever
